

To whom This May Concern,

I have been a subscriber of XM Satellite Radio since January of 2001. I only listen to regular broadcast FM radio when forced to. I am more than tired of the endless commercials, the Foul language, that the DJ's seem to think is the norm, or funny, and the most inappropriate subject matter being broadcasted on the air. If the XM service wants to broadcast Weather and Traffic information, so be it. Is the regular broadcasting system afraid that one more time they will be shown how it should be done, and not how ineffectively it is currently being done? We are paying for this service to begin with, so what is the problem? Or, is the broadcasting industry afraid that one more time they will be shown how really poor their service actually is, everyone pays for the non fee broadcasting by purchasing their products and advertising fee's, we here at XM Satellite choose to pay our fee's up front! Again, donot restrict them from broadcasting Weather and Traffic Reports.
